forwarded to identified Prospective Bidders through an expeditious identified source of communication, e.g.: e-mail etc., including a description of the inquiry, but without identifying its source.

- v) Should the Procuring Agency deem it necessary to amend the Bidding Documents as a result of a clarification, it shall do so following the procedure under **ITB 2.2.3**.
- vi) If indicated **in the BDS**, the Bidder's designated representative is invited at the Bidder's cost to attend a pre-Bid meeting at the place, date and time mentioned **in the BDS**. During this pre-Bid meeting, prospective Bidders may request clarification of the schedule of requirement, the Evaluation Criteria or any other aspects of the Bidding Documents.
- vii) Minutes of the pre-Bid meeting, if applicable, including the text of the questions asked by Bidders, including those during the meeting (without identifying the source) and the responses given, together with any responses prepared after the meeting will be transmitted promptly to all prospective Bidders who have obtained the Bidding Documents and by uploading same on the website of the procuring agency. Any modification to the Bidding Documents that may become necessary as a result of the pre-Bid meeting shall be made by the Procuring Agency exclusively through the use of an Addendum pursuant to ITB 2.2.3. Non-attendance at the pre-Bid meeting will not be a cause for disqualification of a Bidder.

2.2.3. Amendment of Bidding Documents

- i) At any time prior to the deadline for submission of Bids, but not later than three (3) days before the closing date of the submission of Bid, the Procuring Agency, for any reason, whether at its own initiative or in response to a clarification requested by a prospective Bidder, may modify the Bidding documents by amendment. Any such change/amendment in the Bidding documents shall be provided in a timely manner, preferably through electronic means also, not later than three (3) days, and on equal opportunity basis as per Rule-25(3) OR Rule 25(4) of PPR-14 as the case may be.
- ii) In order to allow prospective Bidders reasonable time in which to take an addendum into account in preparing their Bids, the Procuring Agency, at its discretion, may extend the deadline for the submission of Bids, as per rule 29 of PPR-14, in the manner similar to the original advertisements, so as to avoid any

2.5.3. Clarification of Bids

- i) As per rule 33(2) of PPR-14, to assist in the examination, evaluation and comparison of Bids and post-qualification of the Bidders, the Procuring Agency may, at its discretion, ask any Bidder for a clarification of its Bid including breakdown of prices to determine its reasonability. Any clarification submitted by a Bidder that is not in response to a request by the Procuring Agency shall not be considered.
- ii) The request for clarification and the response shall be in writing or in electronic forms that provide record of the content of communication. In case of Single Stage Two Envelope Procedure, no change in the prices or substance of the Bid shall be sought, offered, or permitted. Whereas in case of Single Stage One Envelope Procedure, only the correction of arithmetic errors discovered by the Procuring Agency in the evaluation of Bids should be sought in accordance with ITB Clause 2.5.6.
- iii) The alteration or modification in The Bid which in any way affect the following parameters will be considered as a change in the substance of a bid:
 - a) Evaluation & qualification criteria;
 - b) Required scope of work or specifications;
 - c) All securities requirements;
 - d) Tax requirements;
 - e) Terms and conditions of bidding documents.
 - f) Change in the ranking of the Bidder
- iv) From the time of Bid opening to the time of Contract award if any Bidder wishes to contact the Procuring Agency on any matter related to the Bid it should do so in writing or in electronic forms that provide record of the content of communication.

2.5.4. Preliminary Examination

- i) The Procuring Agency will examine the Bids to determine whether they are complete, whether any computational errors have been made, whether required sureties have been furnished, whether the documents have been properly signed, and whether the Bids are generally in order.
- ii) Arithmetical errors will be rectified on the following basis: -
 - a. If there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail, and the total price shall be corrected. If the Supplier does not accept

the correction of the errors, its Bid may be rejected, and its Bid security may be forfeited.

- b. If there is a discrepancy between words and figures, the amount in words will prevail.
- iii) Prior to the detailed evaluation, the Procuring Agency will determine the responsiveness of each Bid to the Bidding documents, pursuant to ITB Clause 2.5.5. For purposes of these Clauses, a responsive Bid is one which conforms to all the terms and conditions of the Bidding documents without material deviations. Deviations from, or objections or reservations to critical provisions, **such as** those concerning **Bid Security** (ITB Clause 2.3.8), **Applicable Law** (GCC Clause 30), **Taxes and Duties** (GCC Clause 32) & mandatory Registrations/ Renewals will be deemed to be a material deviation. The Procuring Agency's determination of a Bid's responsiveness is to be based on the contents of the Bid itself without recourse to extrinsic evidence.
- iv) If a Bid is not responsive, it will be rejected by the Procuring Agency and may not subsequently be made responsive by the Bidder by correction of the non-conformity.
- v) Prior to the detailed evaluation of Bids, the Procuring Agency will determine whether each Bid:
 - a) Meets the eligibility criteria defined in **ITB 2.1.3** and **ITB 2.1.4**;
 - b) Has been prepared as per the format and contents defined by the Procuring Agency in the Bidding Documents;
 - c) Has been properly signed;
 - d) Is accompanied by the required securities; and
 - e) Is responsive to the requirements of the Bidding Documents.

The Procuring Agency's determination of a Bid's responsiveness will be based on the contents of the Bid itself.

2.5.5. Examination of Terms and Conditions; Technical Evaluation

- i) The Procuring Agency shall examine the Bid to confirm that all terms and conditions specified in the **GCC** and the **SCC** have been accepted by the Bidder without any material deviation or reservation.
- ii) The Procuring Agency shall evaluate the technical aspects of the Bid submitted to confirm that all requirements specified in **Section III-Technical Specifications, Section VII – Schedule**

of Requirements & Evaluation Criteria as provided in BDS,
have been met without material deviation or reservation.

- iii) If after the examination of the terms and conditions and the technical evaluation, the Procuring Agency determines that the Bid is not responsive in accordance, it shall reject the Bid.

2.5.6. Correction of Errors

- i) Bids determined to be substantially responsive will be checked for any arithmetic errors. Errors will be corrected as follows: -
- a) If there is a discrepancy between unit prices and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail, and the total price shall be corrected, unless in the opinion of the Procuring Agency there is an obvious misplacement of the decimal point in the unit price, in which the total price as quoted shall govern and the unit price shall be corrected;
 - b) If there is an error in a total corresponding to the addition or subtraction of sub-totals, the sub-totals shall prevail and the total shall be corrected; and
 - c) Where there is a discrepancy between the amounts in figures and in words, the amount in words will govern.
 - d) Where there is discrepancy between grand total of price schedule and amount mentioned on the Form of Bid, the amount referred in Price Schedule shall be treated as correct subject to elimination of other errors.
- ii) The amount stated in the Bid will, be adjusted by the Procuring Agency in accordance with the above procedure for the correction of errors. The concurrence of the Bidder shall be considered as binding upon the Bidder. If the Bidder does not accept the corrected amount, its Bid will then be rejected, and the Bid Security may be forfeited or the Bid Securing Declaration may be executed in accordance with **ITB 2.3.8.**

2.5.7. Conversion to Single Currency

- i) As per rule 32(2) of PPR-14, to facilitate evaluation and comparison, the Procuring Agency will convert all Bid prices expressed in the amounts in various currencies in which the Bid prices as follows:

For the purposes of comparison of bids quoted in different currencies, the price shall be converted into a single currency specified in the bidding documents. 2.5.8. Post-Qualification & Evaluation of Bids

- i) In the absence of **prequalification**, the Procuring Agency will determine to its satisfaction whether the Bidder is qualified to perform the contract satisfactorily, in accordance with the evaluation criteria listed in BDS & pursuant to ITB Clause 2.1.3.
- ii) The determination will take into account the Bidder's financial, technical, and production / supplying capabilities. It will be based upon an examination of the documentary evidence of the Bidder's qualifications submitted by the Bidder, pursuant to ITB Clause 2.3.6, as well as such other information required for eligibility/qualification expressed in Bid Data Sheet as the Procuring Agency deems necessary and appropriate.
- iii) The Procuring Agency will **technically evaluate** and compare the Bids which have been determined to be responsive, pursuant to ITB Clause 2.5.5, as per Technical Specifications required.
- iv) The **financial evaluation** of a Bid will be on the basis of form of Price Schedules/ Financial Bid Form 8.10 to be decided by the Procuring Agency which must include clear cut instruction regarding item wise or package wise evaluation inclusive of prevailing taxes, duties, fees etc.

2.5.9. Contacting the Procuring Agency

- i) Subject to ITB Clause 2.5.3, no Bidder shall contact the Procuring Agency on any matter relating to its Bid, from the time of the Bid opening to the time the evaluation report is made public i.e. 10 days before the contract is awarded. If the Bidder wishes to bring additional information or has grievance to the notice of the Procuring Agency, it should do so in writing.
- ii) Any effort by a Bidder to influence the Procuring Agency during Bid evaluation, or Bid comparison may result in the rejection of the Bidder's Bid.

2.5.10. Grievance Redressal

- i) As per Rule-67 of PPR-14, Procuring Agency shall constitute a Grievance Redressed Committee (GRC) comprising of odd number of persons with proper powers and authorization to address the complaints. The GRC shall not have any of the members of the Procurement Evaluation Committee. The Committee may preferably have one subject specialist depending upon the nature of the procurement in addition to one person with legal background as per their availability to the Procuring Agency.

- ii) The Bidders shall be promptly informed about the rejection of the Bids, if any
- iii) The Procuring Agency shall upon request communicate to any Bidder, the grounds for its rejection of all Bids or proposals, but shall not be required to justify those grounds.

2.6.7. Re-Bidding

- i) If the Procuring Agency rejects all the Bids under rule 35, it may proceed with the process of fresh Bidding but before doing that it shall assess the reasons for rejection and may, if necessary, revise specifications, evaluation criteria or any other condition for Bidders.

2.6.8. Corrupt or Fraudulent Practices

- i) The Procuring Agency Bidders, Suppliers, and Contractors observe the highest standard of ethics during the procurement and execution of contracts.

“Corrupt practices” in respect of procurement process, shall be as given in S-2 (d) of PPRA, Act, 2009, which is as follows:

“(d) “corrupt practice” means the offering, giving, receiving, or soliciting of anything of value to influence the action of a public official, bidder or Contractor in the procurement process or in Contract execution to the detriment of the procuring agency; or misrepresentation of facts in order to influence a procurement process or the execution of a Contract, collusive practices among bidders (prior to or after bid submission) designed to establish bid prices at artificial, noncompetitive levels and to deprive the procuring agency of the benefits of free and open competition and any request for, or solicitation of anything of value by any public official in the course of the exercise of his duty; it may include any of the following:

- i. *Coercive practice by impairing or harming, or threatening to impair or harm, directly or indirectly, any party or the property of the party to influence the actions of a party to achieve a wrongful gain or to cause a wrongful loss to another party;*
- ii. *Collusive practice by arrangement between two or more parties to the procurement process or Contract execution, designed to achieve with or without the knowledge of the procuring agency to establish prices at artificial, noncompetitive levels for any wrongful gain;*
- iii. *Offering, giving, receiving or soliciting, directly or indirectly, of anything of value to influence the acts of another party for wrongful gain;*
- iv. *Any act or omission, including a misrepresentation, that knowingly or recklessly misleads, or attempts to mislead, a party to obtain a financial or other benefit or to avoid an obligation;*
- v. *Obstructive practice by harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in a procurement process, or affect the execution of a Contract or deliberately destroying, falsifying, altering or concealing of evidence material to the investigation or making false statements before investigators in order to materially impede an investigation into allegations of a corrupt, fraudulent, coercive or collusive practice; or threatening, harassing or intimidating any party to prevent it from disclosing its knowledge of matters relevant to the investigation or from pursuing the investigation, or acts intended to materially impede the exercise of inspection and audit process.”*

ii) Blacklisting & Debarment:

Blacklisted Consultants and those found involved in “Corrupt Practices” are not allowed to participate in bidding.

Requirements & Procedure for Blacklisting & Debarment:

As per S-17A of PPRA, Act, 2009:

“17A. Blacklisting.– (1) *A procuring agency may, for a specified period and in the prescribed manner, debar a bidder or Contractor from participating in any public procurement process of the procuring agency, if the bidder or Contractor indulges in corrupt practice or any other prescribed practice.*

(2) *The Managing Director may, in the prescribed manner, debar a bidder or Contractor from*

participating in any public procurement process of all or some of the procuring agencies for a specified period.

(3) *Any person, aggrieved from a decision of a procuring agency, may within prescribed period prefer a representation before the Managing Director.*

(4) *A procuring agency or any other person, aggrieved from a decision of the Managing Director, may within prescribed period prefer a representation before the Chairperson whose decision on such representation shall be final.]*

As per rule 21 of PPR-14:

21. Blacklisting.—(1) *A procuring agency may, for a specified period, debar a bidder or Contractor from participating in any public procurement process of the procuring agency, if the bidder or Contractor has:*

(a) acted in a manner detrimental to the public interest or good practices;

(b) consistently failed to perform his obligation under the Contract;

(c) not performed the Contract up to the mark; or

(d) indulged in any corrupt practice.

(2) *If a procuring agency debars a bidder or Contractor under sub-rule (1), the procuring agency:*

(a) shall forward the decision to the Authority for publication on the website of the Authority; and

(b) may request the Authority to debar the bidder or Contractor for procurement of all procuring agencies.

(3) *The Managing Director may debar a bidder or Contractor of any procuring agency from participating in any public procurement process of all or some of the procuring agencies for such period as the Managing Director may determine.*

(4) *Any person aggrieved by a declaration made under rule 20 or a decision under sub-rule (1) of this rule may, within thirty days from the date of the publication of the information on the website of the Authority, file a representation before the Managing Director and the Managing Director may pass such order on the representation as he may deem fit.*

(5) *Any person or procuring agency aggrieved by an order under sub-rule (3) or (4) may, within thirty days of the order, file a representation before the Chairperson and the Chairperson may pass such order on the representation as he may deem appropriate.*

(6) *The mechanism or process for barring a bidder or Contractor from participating in procurement process of a procuring agency, procuring agencies and a representation under this rule is specified in the Schedule appended to these rules.*

As per Schedule appended with PPR-14:

SCHEDULE

see sub-rule (6) of rule 21

BLACKLISTING MECHANISM OR PROCESS

1. *The procuring agency may, on information received from any resource, issue show cause notice to a bidder or Contractor.*
2. *The show cause notice shall contain:*
 - (a) *precise allegation, against the bidder or Contractor;*
 - (b) *the maximum period for which the procuring agency proposes to debar the bidder or Contractor from participating in any public procurement of the procuring agency; and*
 - (c) *the statement, if needed, about the intention of the procuring agency to make a request to the Authority for debarring the bidder or Contractor from participating in public procurements of all the procuring agencies.*
3. *The procuring agency shall give minimum of seven days to the bidder or Contractor for submission of written reply of the show cause notice.*
4. *In case, the bidder or Contractor fails to submit written reply within the requisite time, the procuring agency may issue notice for personal hearing to the bidder or Contractor/ authorize representative of the bidder or Contractor and the procuring agency shall decide the matter on the basis of available record and personal hearing, if availed.*
5. *In case the bidder or Contractor submits written reply of the show cause notice, the procuring agency may decide to file the matter or direct issuance of a notice to the bidder or Contractor for personal hearing.*
6. *The procuring agency shall give minimum of seven days to the bidder or Contractor for appearance before the specified officer of the procuring agency for personal hearing.*
7. *The procuring agency shall decide the matter on the basis of the available record and personal hearing of the bidder or Contractor, if availed.*
8. *The procuring agency shall decide the matter within fifteen days from the date of personal hearing unless the personal hearing is adjourned to a next date and in such an eventuality,*

Bidder's Signature and Stamp

the period of personal hearing shall be reckoned from the last date of personal hearing.

9. *The procuring agency shall communicate to the bidder or Contractor the order of debarring the bidder or Contractor from participating in any public procurement with a statement that the bidder or Contractor may, within thirty days, prefer a representation against the order before the Managing Director of the Authority.*
 10. *The procuring agency shall, as soon as possible, communicate the order of blacklisting to the Authority with the request to upload the information on its website.*
 11. *If the procuring agency wants the Authority to debar the bidder or Contractor from participating in any public procurement of all procuring agencies, the procuring agency shall specify reasons for such dispensation.*
 12. *The Authority shall immediately publish the information and decision of blacklisting on its website.*
 13. *In case of request of a procuring agency under para 11 or representation of any aggrieved person under rule 21, the Managing Director shall issue a notice for personal hearing to the parties and call for record of proceedings of blacklisting. The parties may file written statements and documents in support of their contentions.*
 14. *In case of representation of any aggrieved person or procuring agency under rule 21, the Chairperson shall issue a notice for personal hearing to the parties and may call for the record of the proceedings. The parties may file written statements and documents in support of their contentions.*
 15. *In every order of blacklisting under rule 21, the procuring agency shall record reasons of blacklisting and also reasons for short, long or medium period of blacklisting.*
 16. *The Authority shall upload all the decisions under rule 21, available with it, on its website. But the name of a bidder or Contractor shall immediately be removed from the list of blacklisted persons on expiry of period of blacklisting or order of the competent authority to that effect, whichever is earlier.*
 17. *An effort shall be made for electronic communication of all the notices and other documents pursuant to this mechanism or process.”*
- iii) Furthermore, Bidders must keep themselves aware of the provision stated in clause 5.4 and clause 24.1 of the General Conditions of Contract.

2.6.9. Quantity and volume of the goods to be considered in mind

[Framework Contract Modality]

- i) While quoting the rate in a framework contract, the Bidder must consider the following facts:
 - a. Certain volume and quantity of the goods as prescribed in Bid Data Sheet.
 - b. The Bidder have to maintain the rates of the goods for the whole financial year.
 - c. The Bidder should quote the rate as per Price Schedule/ Financial Bid form. In case of non-observance of prescribed format, Financial Bid may be rejected.

6	Distance Meter Digital (Laser Distance 300 Meter)	38	<p>Measurement Range Range: 0.05 m (5 cm) to 300 meters (or 1000 feet), depending on the model. Accuracy: Typically ± 1.5 mm to ± 3 mm (depends on the model and range). Measurement Units: Can measure in meters (m), centimeters (cm), millimeters (mm), inches (in), or feet (ft). Most devices offer toggle options between metric and imperial units.</p> <p>2. Measurement Method Laser Technology: Uses a laser beam to calculate the distance. Most modern devices use Class II or IIIa lasers (safe for human eyes with normal use). Measurement Time: Typically 0.5 to 4 seconds per measurement. Laser Wavelength: Often in the range of 620-690 nm (visible red light) for easy targeting.</p> <p>3. Measurement Modes Single Measurement Mode: Measures the distance from one point to another. Continuous Measurement Mode: Measures the real-time distance as the device moves. Area Measurement: Allows the calculation of the area by taking length and width measurements. Volume Measurement: Measures and calculates volume (length \times width \times height). Pythagorean Theorem Mode (Indirect Measurement): Measures indirectly by calculating the distance to an inaccessible point using right-angle measurements. Min/Max Mode: Can determine the shortest or longest distance, which is useful for checking various points in a single measurement. Height Measurement: Some advanced models can measure the height of objects using the laser's angle.</p> <p>4. Power Supply Power Source: Typically powered by 2 x AAA batteries or a rechargeable Li-ion battery. Battery Life: Can last anywhere from 1000 to 5000 measurements on a single charge or set of batteries, depending on the device and settings (e.g., backlight on/off). Low Battery Indicator: Yes, alerts the user when the battery level is low. Auto Shut-Off: Automatically turns off after a period of inactivity to conserve battery life.</p> <p>5. Accuracy and Precision Accuracy: Common models offer accuracy within ± 1.5 mm to ± 3 mm. Tolerance: May be influenced by environmental conditions, such as surface reflectivity, ambient light, and temperature.</p> <p>6. Environmental Resistance Waterproof and Dustproof: Many models are rated IP54, IP65, or even IP67, making them resistant to dust, water splashes, and light rain. Temperature Range: Designed to operate in temperatures ranging from -10°C to 50°C (14°F to 122°F). Some high-end models may work in more extreme conditions.</p> <p>7. Laser Beam Characteristics Laser Type: Class II or IIIa laser, which is safe for the eyes with normal use.</p>
---	---	----	--

		<p>Laser Spot Size: Typically 6 mm at 10 meters, expanding to 30 mm to 60 mm at 100 meters or more, depending on the model.</p> <p>Targeting: Models with a visible laser allow the user to clearly see the spot for targeting, especially useful for long distances.</p> <p>8. Display Type: Typically an LCD or LED display (backlit for use in low-light conditions). Display Size: Usually 1.5 to 2 inches in diagonal. Multifunctional Display: Can display multiple measurements, such as distance, area, volume, and memory. Digit Capacity: Can typically show 3 to 4 digits for distance and up to 5 digits for area or volume measurements.</p> <p>9. Additional Features Bluetooth Connectivity: Some models have Bluetooth for wireless transfer of data to mobile apps or software for data logging and analysis. Memory Storage: Can store several measurements (e.g., 10 to 20 measurements), which can be recalled at a later time. Tilt Sensor: Some models include an electronic tilt sensor that helps in measuring angles and slopes, useful for terrain measurements or architectural measurements. Auto Leveling: Some higher-end models automatically level the device to ensure precise measurements. Angle Measurement: Some devices come with built-in tilt sensors or are compatible with external angle sensors to measure angles.</p> <p>10. Dimensions and Weight Size: Typically compact, around 120 mm x 60 mm x 35 mm. Weight: Generally between 200–350 grams (depending on size, battery type, and material construction).</p> <p>11. Special Features for Long-Range Measurement High Precision for Long Distances: Some 300-meter laser distance meters have specialized features for high-precision measurements over longer distances. Multiple Targeting Options: Many devices come with multiple target options, including prism reflectors (for surveying) or beam adjustment to measure at large distances in environments where the laser may scatter. Outdoor Mode: Enhanced performance in bright daylight or outdoors with specialized optics or a high-power laser.</p> <p>12. Common Applications Construction: Measuring large distances, room dimensions, or determining distances between walls. Surveying and Land Measurement: Measuring the distance between survey points in outdoor or hard-to-reach areas. Real Estate: Measuring floor areas, building dimensions, and property boundaries. Interior Design: Measuring large spaces or distances for planning furniture layout or renovations. Engineering: Precision measurement for industrial and infrastructure projects. Landscaping: Measuring large garden plots, outdoor spaces, or terrain features.</p>

7	Digital Vernier Calliper	38	<p>1. Measuring Range Measuring Range: Typically 0 to 150 mm (6 inches), 0 to 200 mm (8 inches), or 0 to 300 mm (12 inches) depending on the model. Graduation: Usually 0.01 mm or 0.0005 inches. Max Measurement Length: For larger models, it may go up to 600 mm or even 1000 mm, used for industrial applications.</p> <p>2. Measurement Types External Measurements: To measure the outer dimensions of objects (e.g., diameter or thickness). Internal Measurements: To measure internal dimensions such as the inside diameter of pipes or holes. Depth Measurements: To measure the depth of holes, slots, or recesses. Step Measurements: To measure step heights or small ledges.</p> <p>3. Display Type: Digital LCD or LED display (backlit for easy reading in low light conditions). Display Resolution: Typically 0.01 mm or 0.0005 inches. Units: Can switch between mm (millimeters) and inches (in). Reading Format: Shows measurements with a clear, direct reading on the screen without the need for complex interpretation.</p> <p>4. Accuracy and Precision Accuracy: Generally ± 0.02 mm to ± 0.03 mm. Measurement Tolerance: Can vary based on the material, temperature, and the caliper's calibration. Always check the manufacturer's specifications. Resolution: The smallest unit typically displayed is 0.01 mm or 0.0005 inches.</p> <p>5. Material and Build Material: Typically made from stainless steel, carbon fiber, or plastic (for lighter or lower-cost models). Stainless Steel: Provides durability, corrosion resistance, and precise measurements. Plastic: Found in lower-end models, offering light weight and lower cost but less durability. Finish: Polished or coated for corrosion resistance and smooth operation. Slide Mechanism: Smooth sliding action for accurate, consistent measurements.</p> <p>6. Power Supply Battery Type: Commonly uses 1 x SR44 or LR44 button cell batteries (depending on the model). Battery Life: Typically lasts 1-2 years based on average use. Low Battery Indicator: Yes, an indicator will alert you when the battery is low. Auto Shut-Off: Many models have an automatic power-off function after a period of inactivity (e.g., after 5 minutes) to save battery.</p> <p>7. Functions Zeroing Function: The ability to set the caliper to "zero" at any point during measurement, which is useful when measuring the difference between two points. Hold Function: Allows the measurement to be held on the display, which is useful when the caliper is hard to read (e.g., when measuring in tight spaces). Clear Function: Resets the reading to zero. Inch/mm Toggle: Allows easy switching between metric (mm) and</p>

			<p>imperial (inches) units.</p> <p>Data Output (Some Models): Some advanced models may offer data output options like USB or RS-232 for connecting to computers or data loggers.</p> <p>8. Construction and Design</p> <p>Jaw Types: Typically comes with two external jaws for outer measurements, one internal jaw for internal measurements, and a depth rod for measuring depths.</p> <p>Frame Type: Usually a C-frame or I-beam for stability and comfort.</p> <p>Ergonomic Design: Comfortable handle and sliding mechanism, often with a thumb wheel for smooth movement of the jaws.</p> <p>Screw Lock: Some models feature a thumb screw or locking mechanism to hold the jaws in place once the measurement is taken.</p> <p>9. Measurement Speed</p> <p>Instant Reading: Digital calipers provide immediate readings on the display as the jaws are adjusted.</p> <p>Update Frequency: Typically fast enough to provide continuous measurement without delay, even for fast adjustments.</p> <p>10. Temperature Compensation</p> <p>Operating Temperature Range: Most digital calipers operate in temperatures from 0°C to 40°C (32°F to 104°F).</p> <p>Thermal Expansion Compensation: Some higher-end models include compensation for temperature changes, ensuring the measurements remain accurate even in varying environmental conditions.</p> <p>11. Dimensions and Weight</p> <p>Size: Generally compact, with an overall length ranging from 150 mm (for 6-inch models) to 300 mm (for 12-inch models).</p> <p>Weight: Typically between 100 grams to 250 grams, depending on the material and design.</p> <p>12. Environmental Resistance</p> <p>Water Resistance: Some models are IP54 rated, meaning they are protected against water splashes and dust.</p> <p>Shockproof: While not all models are shockproof, some higher-end models have rubberized edges or are designed to withstand minor impacts.</p>

8	Rebound Hammer Calibration Anvil	2	<p>1. Material and Construction Material: The calibration anvil is typically made from hardened steel or tungsten carbide to ensure a consistent, durable, and highly uniform surface for accurate calibration. Surface Finish: The anvil surface is polished and smooth to ensure the best possible interaction between the rebound hammer and the surface. Hardness: The hardness of the anvil should be at least 700 to 800 HV (Vickers Hardness) to provide a standard surface that can generate a predictable rebound value for calibration. Dimensions: Calibration anvils typically have the following dimensions: Diameter: Typically 100 mm to 150 mm (4 to 6 inches), depending on the model and requirements. Thickness: The thickness of the anvil is usually between 30 mm to 50 mm. Weight: The weight can vary from 2 kg to 5 kg depending on the size and material.</p> <p>2. Rebound Number Standard Standard Rebound Value: The anvil is designed to provide a known and consistent rebound value when tested with a calibrated rebound hammer. Rebound Value: Typically, a Rebound Hammer Calibration Anvil provides a rebound value of 80 ± 2 on the Schmidt hammer scale. This value is used as the benchmark to verify the calibration of the rebound hammer. Tolerance: The tolerance in rebound value for the calibration anvil should typically be within ± 2 or ± 1 to maintain the accuracy of the calibration.</p> <p>3. Compatibility Rebound Hammer Type: The calibration anvil is designed to work with common Schmidt Rebound Hammers (Type N, L, or other variants) and similar concrete hardness testing devices. Surface Compatibility: It should be compatible with various models of rebound hammers that are used in concrete testing and non-destructive testing (NDT) methods. Testing Procedure: The rebound hammer is typically tested by performing several impacts on the calibration anvil and adjusting the calibration to ensure the hammer's rebound value is consistent with the known value of the anvil.</p> <p>4. Performance Specifications Uniformity: The anvil surface must be extremely uniform to ensure accurate and repeatable rebound values. Any surface imperfections can lead to inconsistent measurements. Stability: The calibration anvil must be stable and resistant to wear over time. Continuous use or exposure to elements should not significantly alter its hardness or surface. Durability: Since calibration anvils are often used in harsh environments, they should be resistant to damage from impacts, environmental exposure, and wear over time. Maintenance: The anvil should require minimal maintenance. However, periodic cleaning and inspection for surface damage are recommended to maintain calibration accuracy.</p> <p>5. Calibration Method Calibration Process: To calibrate the rebound hammer, several tests are performed on the anvil's surface. These results are then</p>
---	----------------------------------	---	---

Bidder's Signature and Stamp

			<p>compared to the standard rebound value provided by the manufacturer.</p> <p>Adjustment: If the rebound hammer shows a deviation from the standard value, the device can be adjusted accordingly.</p> <p>Number of Impacts: Typically, 3 to 5 impacts are recommended on different areas of the anvil's surface to ensure accurate calibration. The rebound hammer should show consistent results for each impact.</p> <p>Certification: Calibration anvils may come with a certification of calibration, which details the rebound value and tolerance range at the time of calibration. Some models also offer traceability to international standards like ISO 8045.</p> <p>6. Accuracy and Precision</p> <p>Tolerance for Calibration: The rebound value from the calibration anvil should be within ± 2 points of the specified reference value to ensure the hammer is calibrated accurately.</p> <p>Verification: A certified calibration anvil is verified by an accredited laboratory or manufacturer to ensure it meets national or international standards (e.g., ISO, ASTM).</p>

9	Core Drill Machine	4	<p>1. Drilling Capacity Maximum Drilling Diameter: Common core drill machines can handle drilling diameters ranging from 12 mm to 350 mm (1/2 inch to 14 inches). Some heavy-duty models may go up to 500 mm (20 inches) or more. Drilling Depth: Varies by model and type, but common core drill machines have a drilling depth of 300 mm to 600 mm (12 inches to 24 inches). For deeper drilling, extension rods or additional equipment can be added to increase depth. Core Bit Compatibility: Machines are designed to be compatible with various core bits, typically ranging from diamond core bits for hard materials (e.g., concrete) to carbide-tipped or tungsten carbide bits for softer materials like masonry or asphalt.</p> <p>2. Power Source Electric Powered: Most core drill machines are electric, with power ratings typically between 1.5 kW (2 HP) to 5.5 kW (7.5 HP). These are suitable for most construction, concrete, and masonry applications. Voltage: Common voltages include 110V, 220V, 230V, or 380V depending on the region and application. Frequency: Typically operates at 50Hz or 60Hz. Hydraulic Powered: Some heavy-duty core drill machines used in large-scale construction or mining operations are hydraulically powered. Pneumatic Powered: Pneumatic core drill machines are used in environments where electricity is not available, such as in underground mining or offshore drilling. Battery-Powered: Cordless or battery-operated core drills are available for smaller applications, with 12V to 18V battery packs providing mobility without the need for a power outlet.</p> <p>3. Motor and Power Ratings Motor Power: Core drill machines typically use motors in the range of 1.5 kW to 5.5 kW. Larger motors provide more power, enabling the drill to handle tougher materials. RPM (Revolutions Per Minute): Common core drill machines have a motor speed range between 500 RPM and 2500 RPM depending on the material being drilled. Slower speeds are better for hard materials like concrete, while higher speeds are used for softer materials. Torque: Core drill machines are designed to provide high torque, which is critical for drilling through tough materials like reinforced concrete.</p> <p>4. Drilling Mechanism Rotary Drilling: The machine rotates the core bit and applies pressure to the material being drilled. The core bit, often a diamond segment or carbide, drills through the material while a slurry of water (for cooling) is usually used to remove dust and debris. Hammer Drilling: Some core drill machines, especially those used in masonry or reinforced concrete, feature a hammer mechanism that combines rotary action with percussive force to aid in breaking up tough materials.</p> <p>5. Cooling System Water-Cooling: Core drills often require water cooling, especially when drilling into concrete or stone. Water tanks or hose connections are provided to ensure a constant flow of water to the drill bit.</p>
---	--------------------	---	--

			<p>Water Flow Rate: Typical water flow rates range from 2 to 5 liters per minute, depending on the size of the drill and the material.</p> <p>Dry Drilling: Some models are equipped for dry drilling, though these typically require special diamond core bits designed for dry applications and may produce more dust.</p> <p>6. Mounting and Operation Type</p> <p>Handheld (Portable): Smaller core drills are handheld and used for light drilling work. These machines are more compact and easier to transport.</p> <p>Weight: Portable core drills usually weigh between 4 kg to 10 kg.</p> <p>Stand-mounted (Rig-mounted): Larger core drills are mounted on a stand or a rig for stability during operation. This allows for more control and precision when drilling through thick or tough materials.</p> <p>Weight: Rig-mounted core drills are generally heavier and can range from 20 kg to 70 kg or more.</p> <p>Floor-mounted: Some core drill machines are permanently installed in workshops or on a dedicated drilling station. These models are typically larger and used for industrial drilling.</p> <p>7. Drilling Speed Control</p> <p>Variable Speed Control: Many modern core drills come with variable speed controls, allowing the operator to adjust the drilling speed to suit the material being drilled (faster speeds for softer materials and slower speeds for harder materials).</p> <p>Speed Settings: A typical core drill might have 2 to 3 speed settings, or an infinitely variable speed control depending on the model.</p> <p>8. Chuck and Arbor</p> <p>Chuck Type: The chuck holds the core bit in place. Most machines use quick-change chucks for easy bit swapping without the need for tools.</p> <p>Arbor: The arbor is the central part of the core drill that connects the motor to the core bit. It's usually made of hardened steel for durability and to withstand high torque.</p> <p>9. Weight and Dimensions</p> <p>Weight: The weight of a core drill can vary significantly depending on the model, power, and size.</p> <p>Portable models weigh between 4 kg to 15 kg.</p> <p>Heavy-duty models used for larger applications can weigh between 30 kg to 70 kg or more.</p> <p>Dimensions: Vary by model, but most handheld core drills have compact dimensions around 400 mm x 200 mm x 300 mm, while stand-mounted models will be larger to accommodate a drill rig.</p> <p>10. Safety Features</p> <p>Overload Protection: Many core drill machines come with overload protection to prevent the motor from burning out during heavy-duty operation.</p> <p>Safety Clutch: Some models include a safety clutch that disengages if the drill bit jams, reducing the risk of injury to the operator.</p> <p>Dust Control: Some core drills are equipped with a dust extraction system or vacuum attachments to minimize the amount of dust generated during dry drilling.</p> <p>Water Drip System: Many drills incorporate a water drip system to keep the core bit cool and minimize dust when working in dry conditions.</p>

10	Dynamic Cone Penetrometer	4	<p>General DescriptionPurpose: The DCP is used to measure the penetration resistance of soils by driving a cone-shaped tip into the ground using a falling weight. The depth of penetration is measured for each drop of the weight, providing an indication of the soil's compaction, shear strength, and stiffness.Standard Reference: The DCP test is commonly performed in accordance with standards like ASTM D6951 (Standard Test Method for Use of the Dynamic Cone Penetrometer in Shallow Subsurface Exploration) or BS 1377-9 (British Standard for soil testing).2. Components and MaterialsCone Penetrometer Tip:Shape: The tip is typically a 60° cone with a flat base or a sharp pointed tip for soil penetration.Material: The cone is usually made of hardened steel or tungsten carbide to ensure durability and resistance to wear when penetrating soils.Cone Diameter: Typically around 20 mm to 30 mm at the base.Rod Sections:Length: Rod sections are generally 1 meter in length (can vary by model).Material: High-strength steel rods or alloy tubes.Diameter: The rods are commonly 25 mm to 50 mm in diameter, ensuring they are sturdy enough to transmit the impact energy to the tip.Hammer (Weight):Weight: The standard hammer typically weighs 10 kg or 20 kg, although the hammer weight can vary depending on the type of soil or the specific requirements of the test.Height of Drop: The hammer is dropped from a height of 500 mm (for a 10 kg hammer) or 750 mm (for a 20 kg hammer).Material: Usually made of steel to withstand repeated drops.Anvil or Base:Base Plate: A solid steel base plate or anvil is often used to provide a stable platform for the penetration test and to absorb the impact from the hammer.Size: Base plates typically have a dimension of 300 mm x 300 mm or 400 mm x 400 mm, designed to prevent shifting during testing.3. Penetration and MeasurementPenetration Rate: The standard test measures the penetration per blow of the hammer. The depth of penetration for each drop of the hammer is typically recorded.Standard Penetration: For a 10 kg hammer, the penetration per blow is typically measured as 10 mm or 20 mm per drop (depending on soil density and other factors).For 20 kg hammers, penetration per blow might be slightly higher, depending on the material being tested.Test Depth: The depth of penetration typically ranges up to 5 meters, although deeper penetrations may be possible depending on soil conditions and the number of rods available.4. Soil Strength IndicationSoil Classification: DCP results can be used to estimate the unconfined compressive strength (UCS) of cohesive soils and the relative density of granular soils.Penetration Resistance: The rate of penetration is typically expressed as mm/blow or cm/blow and used to classify the soil strength.DCP Value: A higher penetration rate (more depth per blow) generally indicates weaker or less compacted soil, while slower penetration indicates denser, stronger soil.Interpretation of Results: The DCP test produces a penetration resistance profile that can be compared with soil type and density, providing a quick and useful indicator of soil strength for road, foundation, or pavement design.5. Test ProcedureInstallation: The cone penetrometer is inserted into the ground, and the hammer is raised and dropped to drive the cone tip into the soil.Recording: The depth of penetration is measured after each blow (typically after every 10 blows).Continuous Testing: The test is repeated as the rod sections are added to the apparatus, allowing the penetrometer to reach greater depths.Soil Profile Logging: Data collected during the</p>
----	---------------------------	---	--

		<p>test can be logged and plotted to create a penetration profile showing changes in soil strength with depth.</p> <p>6. Dimensions and Weight Overall Length: When fully assembled with the rod sections, the total length of the DCP can reach up to 4-5 meters depending on the number of rod sections. Weight: The total weight of the DCP system typically ranges from 15 kg (for lightweight models) to 40 kg (for more robust and heavy-duty models). Transport: Many DCP kits come in a carrying case or box for easy transport to and from job sites.</p> <p>7. Accuracy and Precision Depth Measurement Accuracy: The depth of penetration per blow is typically accurate to within ± 2 mm, depending on the quality of the measuring equipment and technique. Penetration Rate: The mm/blow penetration rate is generally accurate to ± 1 mm. Error Factors: Factors such as soil type, moisture content, compaction, and the operator's skill can influence results, so results should be interpreted carefully.</p> <p>8. Environmental and Operational Conditions Temperature Range: DCPs are typically designed to operate in a range of -10°C to 50°C (14°F to 122°F). Extreme temperatures may affect the performance of the hammer mechanism or the depth measurement accuracy. Soil Conditions: While the DCP works well in granular, cohesive, and mixed soils, extremely soft or very hard rocks may make the test difficult or impossible without special modifications. Moisture Conditions: The DCP can operate in moist conditions, but extreme water saturation or frozen soils may require special consideration.</p> <p>9. Applications Road Construction and Pavement Design: The DCP is commonly used to evaluate the strength and compaction of subgrade soils for road construction. Soil Compaction Testing: It helps determine the compaction quality of soil in construction sites. Foundation Assessment: The DCP is used for evaluating soil strength for building foundations and other civil works. Geotechnical Investigations: Provides valuable data on the soil profile for engineers and geotechnical experts. Mining and Agriculture: Used for determining soil properties for mining operations, land development, or agricultural projects.</p> <p>10. Safety Features Impact Absorption: The DCP system usually includes a shock-absorbing mechanism to prevent excessive impact force on the operator and the machine. Handle Grip: Ergonomic handles or grips are provided to reduce strain on the operator during testing. Safety Shield: In some models, a protective shield or guard is provided around the hammer to protect the user from flying debris or accidental impact.</p>

11	Slum Test	38	<p>Components and Materials Slump Cone (Abrams Cone):</p> <p>Shape: The slump cone is a frustum of a cone, typically 300 mm high with a base diameter of 200 mm and a top diameter of 100 mm.</p> <p>Material: The cone is usually made of steel (for durability) or non-corrosive material.</p> <p>Surface Finish: The cone should have a smooth, non-corrosive surface and be free from any sharp edges.</p> <p>Thickness: The cone walls should be 2 mm to 3 mm thick for adequate durability.</p> <p>Tamping Rod: Material: The tamping rod should be made from steel, and it should have a round cross-section (usually 16 mm in diameter).</p> <p>Length: The rod should be at least 600 mm long for ease of use.</p> <p>Ends: The rod should have flat ends to ensure uniform tamping.</p> <p>Base Plate: The slump cone is placed on a flat, rigid base that is usually made from steel or concrete to ensure stability during testing.</p> <p>Slump Values: The slump value typically ranges from 0 mm to 250 mm or more, depending on the concrete mix and desired workability. The slump can be classified as: Zero Slump (0 mm): Concrete is very stiff and unworkable, often used in dry conditions (e.g., for dry-cast concrete, kerbs, or blocks).</p> <p>Low Slump (25 mm to 75 mm): Concrete is stiff but can still be placed, typically used for pavements or roads.</p> <p>Medium Slump (75 mm to 150 mm): Standard consistency, used for general-purpose concrete.</p> <p>High Slump (150 mm to 250 mm): Concrete is workable, suitable for complex forms or for use in very large pours.</p> <p>Very High Slump (>250 mm): Concrete is highly fluid, usually indicating a high water content, which can reduce strength.</p> <p>Accuracy and Precision</p> <p>Slump Measurement Tolerance: The recorded slump value should have a tolerance of ± 5 mm for accurate and reliable results.</p> <p>Consistency: To ensure consistency, the test should be performed on fresh concrete that has not been sitting for long. It is best to conduct the test within 10 to 15 minutes of mixing.</p> <p>Repeatability: Multiple slump tests (usually 3) may be conducted on the same batch of concrete to verify consistency. The results should not vary by more than 25 mm.</p>
12	Thermometer	38	<p>Measurement range: 32.0 to 43.0°C</p> <p>Accuracy: $\pm 0.1^\circ\text{C}$</p> <p>Sensor: Thermistor</p> <p>Readout: Three digit LCD with indication of out-of-range high or low temperature and low battery</p> <p>Sampling rate: Two per second</p> <p>Power source: Silver oxide cell type SR41W or equivalent giving 200 hours life (three years of normal use approx)</p> <p>Power switch: Manual on/off button</p> <p>Automatic switch-off: Ten minutes after last indication</p> <p>Dimensions: L130 x W18 x H9mm overall</p> <p>Probe tip diameter: 3mm</p> <p>Mass: 7g</p>

14	Standard Digital Penetrometer (Bitumen)	4	<p>Display: Digital LCD/LED screen for clear, easy-to-read results. Typically has a backlit display for better visibility in low light conditions. Display size: 2.5 to 4 inches (depending on model). Penetration Range: 0 to 1000 Penetration Units (10⁻¹ mm) or higher, depending on the model. This range allows for testing materials from very soft to hard bitumen. Resolution: Typically 0.1 mm or 0.01 mm, providing high precision in penetration measurement. Temperature Range: Typically 25°C ± 0.1°C for standard bitumen testing. Accuracy: Temperature control accuracy is typically ±0.1°C Test Duration: Standard penetration test duration is typically 5 seconds (for bitumen), with some models offering extended time options for specific tests or materials. The device measures how far the needle penetrates in that time period to determine the material's consistency. Test Repeatability: The penetrometer should have repeatability within ±1% of the measured value, ensuring consistent and reliable results. Calibration Method: Typically calibrated according to international standards, such as ASTM D5 (Standard Test Method for Penetration of Bituminous Materials) or AASHTO T49.</p>

Section-V: General Conditions of Contract

1. Definitions

1.1 In this Contract, the following terms shall be interpreted as indicated:

- (a) “The Contract” means the agreement entered into between the Procuring Agency and the Supplier, as recorded in the Contract Form signed by the parties, including all attachments and appendices thereto and all documents incorporated by reference therein.
- (b) “The Contract Price” means the price payable to the Supplier under the Contract for the full and proper performance of its contractual obligations.
- (c) “The Goods” means all of the equipment, machinery, and/or other materials which the Supplier is required to supply to the Procuring Agency under the Contract.
- (d) “The Services” means those services ancillary and related to the supply of the Goods, such as transportation and insurance, and any other incidental services, such as installation, commissioning, provision of technical assistance, training, maintenance & repair and other such obligations of the Supplier covered under the Contract.
- (e) “GCC” means the General Conditions of Contract contained in this section.
- (f) “SCC” means the Special Conditions of Contract.
- (g) “The Procuring Agency” means the organization purchasing the Goods & Services, as named in SCC.
- (h) “The Procuring Agency’s country” is the country named in SCC.
- (i) “The Supplier” means the Bidder or firm supplying the Goods and Services under this Contract.
- (j) “The Project Site,” where applicable, means the place or places named in SCC.
- (k) “Day” means calendar day.

2. Application

2.1. These General Conditions shall apply to the extent that they are not superseded by provisions of other parts of the Contract.

Urban Sector Planning & Management Services Unit (Pvt.) Ltd.

3. Country of Origin

[where applicable]

3.1. All Goods and Services supplied under the Contract shall have their origin in the countries and territories eligible under the rules, as further elaborated in the SCC.

3.2. For purposes of this Clause, “origin” means the place where the Goods were mined, grown, or produced, or from where the Services are supplied. Goods are produced when, through manufacturing, processing, or substantial and major assembly of components, a commercially recognized new product is obtained that is substantially different in basic characteristics or in purpose or utility from its components.

3.3. The origin of Goods and Services is distinct from the nationality of the Supplier. In any case, the requirements of rules 10 & 26, PPR-14, shall be followed.

4. Standards

4.1. The Goods supplied under this Contract shall conform to the standards mentioned in the Technical Specifications, and, when no applicable standard is mentioned, to the authoritative standards appropriate to the Goods’ country of origin. Such standards shall be the latest issued by the concerned institution.

5. Use of Contract Documents and Information; Inspection and Audit by the procuring agency.

5.1. The Supplier shall not, without the Procuring Agency’s prior written consent, disclose the Contract, or any provision thereof, or any specification, plan, drawing, pattern, sample, or information furnished by or on behalf of the Procuring Agency in connection therewith, to any person other than a person employed by the Supplier in the performance of the Contract. Disclosure to any such employed person shall be made in confidence and shall extend only so far as may be necessary for purposes of such performance.

5.2. The Supplier shall not, without the Procuring Agency’s prior written consent, make use of any document or information enumerated in GCC Clause 5.1 except for purposes of executing the Contract.

5.3. Any document, other than the Contract itself, enumerated in GCC Clause 5.1 shall remain the property of the Procuring Agency and shall be returned (all copies) to the Procuring Agency on completion of the Supplier’s performance under the Contract if so required by the Procuring Agency.

5.4. The Supplier shall permit the Procuring Agency to inspect the Supplier’s accounts and records relating to the performance of the Supplier and to have them audited by auditors appointed by the donors, if so required by the donors.

6. Patent Rights

6.1. The Supplier shall indemnify the Procuring Agency against all third-party claims of infringement of patent, trademark, or industrial design rights arising from use of the Goods or any part thereof in the Procuring Agency's country.

7. Performance Guarantee

7.1. Within fifteen (15) days *[to be decided by the procuring agency]* of receipt of the notification of Contract award, the successful Bidder shall furnish to the Procuring Agency the Performance Guarantee in the amount specified in SCC/Bid Data Sheet & clause 2.6.2 of ITB.

7.2. The proceeds of the Performance Guarantee shall be payable to the Procuring Agency as compensation for any loss resulting from the Supplier's failure to complete its obligations under the Contract.

7.3. As per Rule-56 of PPR-14, the performance guarantee shall be denominated in the currency of the Contract acceptable to the Procuring Agency and shall be in one of the following forms:

- (a) a bank guarantee or an irrevocable letter of credit issued by a reputable bank located in the Procuring Agency's country, in the form provided in the Bidding documents or another form acceptable to the Procuring Agency; or
- (b) a Bank Guarantee, Bank call-deposit (CDR), Demand Draft (DD), Pay Order (PO) or Banker's cheque cashier's or certified cheque or CDR.

7.4. The performance guarantee will be discharged by the Procuring Agency and returned to the Supplier not later than thirty (30) days following the date of completion of the Supplier's performance obligations under the Contract, including any warranty obligations, unless specified otherwise in SCC.

8. Inspections and Tests

8.1. The Procuring Agency or its representative shall have the right to inspect and/or to test the Goods to confirm their conformity to the Contract specifications at no extra cost to the Procuring Agency. SCC and the Technical Specifications shall specify what inspections and tests the Procuring Agency requires and where they are to be conducted. The Procuring Agency shall notify the Supplier in writing, in a timely manner, of the identity of any representatives nominated for these purposes.

8.2. The inspections and tests may be conducted on the premises of the Supplier or its subcontractor(s), at point of delivery, and/or at the Goods' final destination. If conducted on the premises of the Supplier or its subcontractor(s) (if so allowed by the Procuring Agency), all reasonable facilities and assistance, including access to drawings and

production data, shall be furnished to the inspectors at no charge to the Procuring Agency.

8.3. Should any inspected or tested Goods fail to conform to the Specifications, the Procuring Agency may reject the Goods, and the Supplier shall either replace the rejected Goods or make alterations necessary to meet specification requirements free of cost to the Procuring Agency.

8.4. The Procuring Agency's right to inspect, test and, where necessary, reject the Goods after the Goods' arrival in the Procuring Agency's country shall in no way be limited or waived by reason of the Goods having previously been inspected, tested, and passed by the Procuring Agency or its representative prior to the Goods' shipment from the country of origin.

8.5. Nothing in GCC Clause 8 shall in any way release the Supplier from any warranty or other obligations under this Contract.

9. Packing

9.1. The Supplier shall provide such packing of the Goods as is required to prevent their damage or deterioration during transit to their final destination, as indicated in the Contract. The packing shall be sufficient to withstand, without limitation, rough handling during transit and exposure to extreme temperatures, salt and precipitation during transit, and open storage. Packing case size and weights shall take into consideration, where appropriate, the remoteness of the Goods' final destination and the absence of heavy handling facilities at all points in transit.

9.2. The packing, marking, and documentation within and outside the packages shall comply strictly with such special requirements as shall be expressly provided for in the Contract, including additional requirements, if any, specified in SCC, and in any subsequent instructions ordered by the Procuring Agency.

10. Delivery and Documents

10.1. Delivery of the Goods shall be made by the Supplier in accordance with the terms specified in the Schedule of Requirements. The details of shipping and/or other documents to be furnished by the Supplier are specified in SCC.

10.2. Upon delivery, the Procuring Agency shall give receiving certificate to the supplier with the statement that, "completion certificate along with satisfactory report shall be issued after due inspection as per clause-8 of GCC, which will enable the supplier to put up the bill".

[Further conditions may be incorporated by the Procuring Agency keeping in view the nature of contract, DDP, CIF, C&F, FOR, FOP for example; for a DDP contract the clause may be as follows:].

10.3. For purposes of the Contract, DDP trade term used to describe the obligations of the parties shall have the meanings assigned to them by the current edition of *Incoterms*

10.4. Documents to be submitted by the Supplier are specified in SCC.

11. Insurance

11.1. The Goods supplied under the Contract shall be delivered *[form of content to be decided by the Procuring Agency]* duty form paid under which risk is transferred to the buyer after having been delivered, hence *[details coverage to be decided by the Procuring Agency]* is sellers responsibility.

12. Transportation

12.1. The Supplier is required under the Contract to transport the Goods to a specified place of destination within the Procuring Agency's country, including *(details to be decided by Procuring Agency as per requirement)* insurance and storage, as shall be specified in the Contract, and related costs shall be included in the Contract Price.

13. Incidental Services

13.1. The Supplier may be required to provide any or all of the following services, including additional services, if any, specified in SCC:

- (a) satisfactory performance for specified time/ quantity on-site and/or supervision of on-site assembly and/or start-up of the supplied Goods;
- (b) furnishing of tools required for assembly and/or maintenance of the supplied Goods;
- (c) furnishing of a detailed operations and maintenance manual for each appropriate unit of the supplied Goods;
- (d) performance or supervision or maintenance and/or repair of the supplied Goods, for a period of time agreed by the parties, provided that this service shall not relieve the Supplier of any warranty obligations under this Contract; and
- (e) training of the Procuring Agency's personnel, at the Supplier's plant and/or on-site, in assembly, start-up, operation, maintenance, and/or repair of the supplied Goods.

13.2. Prices charged by the Supplier for incidental services shall be included in the Contract Price for the Goods and shall not exceed:

- (i) the prevailing rates charged for other parties by the Supplier for similar services; and
- (ii) original price of goods.

14. Spare Parts

14.1. As specified in SCC, the Supplier may be required to provide any or all of the following materials, notifications, and information pertaining to spare parts manufactured or distributed by the Supplier:

- (a) such spare parts as the Procuring Agency may choose to purchase from the Supplier, provided that this choice shall not relieve the Supplier of any warranty obligations under the Contract; and
- (b) in the event of termination of production of the spare parts:
 - (i) advance notification to the Procuring Agency of the pending termination, in sufficient time to permit the Procuring Agency to procure needed requirements; and
 - (ii) following such termination, furnishing at no cost to the Procuring Agency, the blueprints, drawings, and specifications of the spare parts, if requested.

15. Warranty

15.1. The Supplier warrants that the Goods supplied under the Contract are new, unused, of the most recent or current models selected by the Procuring Agency, and that they incorporate all recent improvements in design and materials unless provided otherwise in the Contract. The Supplier further warrants that all Goods supplied under this Contract shall have no defect, arising from design, materials, or workmanship (except when the design and/or material is required by the Procuring Agency's specifications) or from any act or omission of the Supplier, that may develop under normal use of the supplied Goods in the conditions prevailing in the country of final destination.

15.2. This warranty shall remain valid for _____ [to be decided by the Procuring Agency] year/months after the Goods, or any portion thereof as the case may be, have been delivered to and accepted at the final destination indicated in the Contract, or for _____ [to be decided by the Procuring Agency] year/months after the date of shipment from the port or place of loading in the source country, whichever period concludes earlier, unless specified otherwise in SCC.

15.3. The Procuring Agency shall promptly notify the Supplier in writing of any claims arising under this warranty.

15.4. Upon receipt of such notice, the Supplier shall, within the period specified in SCC and with all reasonable speed, repair or replace the defective Goods or parts thereof, without costs to the Procuring Agency.

15.5. If the Supplier, having been notified, fails to rectify the defect(s) within the period specified in SCC, within a reasonable period, the Procuring Agency may proceed to take such remedial action as may be necessary, at the Supplier's risk and expense and without prejudice to any other rights which the Procuring Agency may have against the Supplier under the Contract/relevant provision of PPR-14 including Blacklisting.

16. Payment

16.1. The method and conditions of payment to be made to the Supplier under this Contract shall be specified in SCC.

16.2. The Supplier's request(s) for payment shall be made to the Procuring Agency in writing, accompanied by an invoice describing, as appropriate, the Goods delivered and Services performed, and by documents submitted pursuant to GCC Clause 10, and upon fulfillment of other obligations stipulated in the Contract.

16.3. As per rule-62 of PPR-14, payments shall be made promptly by the Procuring Agency, but in no case later than thirty (30) days after submission of an invoice or claim by the Supplier, provided the work is satisfactory.

16.4. The currency of payment is *[to be decided by the Procuring Agency]*

17. Prices

17.1. Prices charged by the Supplier for Goods delivered and Services performed under the Contract shall not vary from the prices quoted by the Supplier in its Bid, with the exception of any price adjustments authorized in SCC.

18. Change Orders

18.1. The Procuring Agency may at any time, by a written order given to the Supplier pursuant to GCC Clause 31, make changes within the general scope of the Contract, only if required for the successful completion of the job, in any one or more of the following:

- (a) drawings, designs, or specifications, where Goods to be furnished under the Contract are to be specifically manufactured for the Procuring Agency;
- (b) the method of shipment or packing;

The Urban Unit

Urban Sector Planning & Management Services Unit (Pvt.) Ltd.

- (c) the place of delivery; and/or
- (d) the Services to be provided by the Supplier.

18.2. If any such change causes an increase or decrease in the cost of, or the time required for, the Supplier's performance of any provisions under the Contract, an equitable adjustment shall be made in the Contract Price or delivery schedule, or both, and the Contract shall accordingly be amended. Any claims by the Supplier for adjustment under this clause must be asserted within thirty (30) days from the date of the Supplier's receipt of the Procuring Agency's change order. But, in no case, the overall impact of the change should exceed 15% of the contract cost and no provisions of PPR-14 should be violated.

19. Contract Amendments

19.1. Subject to GCC Clause 18, no variation in or modification of the terms of the Contract shall be made except by the mutual consent through written amendment signed by the parties. No variation in finalized brands/ makes/models shall be allowed except in special conditions where the manufacturer has stopped producing or suspended that model or the latest model of similar series or version has been launched by the manufacturer or non-availability due to international mergers of the manufacturers or similar unavoidable constraints.

20. Assignment

20.1. The Supplier shall not assign the whole of contract to anybody else. However, some parts of contract or its obligations may be assigned to sub-contractors with the prior written approval of the procuring agency.

21. Sub-contracts

21.1. The Supplier shall notify the Procuring Agency in the Bid of all subcontracts to be assigned under this Contract. Such notification, in the original Bid or later, shall not relieve the Supplier from any liability or obligation under the Contract.

21.2. Subcontracts must comply with the provisions of GCC Clause 20.

22. Delays in the Supplier's Performance

22.1. Delivery of the Goods and performance of Services shall be made by the Supplier in accordance with the time schedule prescribed by the Procuring Agency in the Schedule of Requirements-

22.2. If at any time during performance of the Contract, the Supplier or its subcontractor(s) should encounter conditions impeding timely delivery of the Goods and performance of Services, the Supplier shall promptly notify the Procuring Agency in writing of the fact of the delay, its likely duration and its cause(s). As soon as practicable after receipt of the Supplier's notice, the Procuring Agency shall evaluate the situation and may at its discretion extend the Supplier's time for

Bidder's Signature and Stamp

performance, with or without liquidated damages, in which case the extension shall be ratified by the parties by amendment of Contract.

22.3. Except as provided under GCC Clause 25, a delay by the Supplier in the performance of its delivery obligations shall render the Supplier liable to the imposition of liquidated damages pursuant to GCC Clause 23, unless an extension of time is agreed upon pursuant to GCC Clause 22.2 without the imposition of liquidated damages.

23. Liquidated Damages

23.1. Subject to GCC Clause 25, if the Supplier fails to deliver any or all of the Goods or to perform the Services within the period(s) specified in the Contract, the Procuring Agency shall, without prejudice to its other remedies under the Contract, deduct from the Contract Price, as liquidated damages, a sum equivalent to the percentage specified in SCC of the delivered price of the delayed Goods or unperformed Services for each week or part thereof of delay until actual delivery or performance, up to a maximum deduction of the percentage specified in SCC. Once the maximum is reached, the Procuring Agency may consider termination of the Contract pursuant to GCC Clause 24 along with other remedies available under PPR-14.

24. Termination for Default

24.1. The Procuring Agency, without prejudice to any other remedy for breach of Contract, by written notice of default sent to the Supplier, may terminate this Contract in whole or in part:

- (a) if the Supplier fails to deliver any or all of the Goods within the period(s) specified in the Contract, or within any extension thereof granted by the Procuring Agency pursuant to GCC Clause 22;
- (b) if the Supplier fails to perform any other obligation(s) under the Contract; or
- (c) if the Supplier, in the judgment of the Procuring Agency has engaged in corrupt practices in competing for or in executing the Contract. For the purpose of this clause, corrupt practices will be defined as per Section-2 (d) of The PPRA Act, 2009.

“Corrupt practices” in respect of procurement process, shall be as given in S-2 (d) of PPRA, Act, 2009:

(d) “corrupt practice” means the offering, giving, receiving, or soliciting of anything of value to influence the action of a public official, bidder or Contractor in the procurement process or in Contract execution to the detriment of the procuring agency; or misrepresentation of facts in order to influence a procurement process or the execution of a Contract, collusive practices among bidders (prior to or after bid submission) designed to establish bid prices at artificial, noncompetitive levels and to deprive the procuring agency of

the benefits of free and open competition and any request for, or solicitation of anything of value by any public official in the course of the exercise of his duty; it may include any of the following:

- vi. coercive practice by impairing or harming, or threatening to impair or harm, directly or indirectly, any party or the property of the party to influence the actions of a party to achieve a wrongful gain or to cause a wrongful loss to another party;*
- vii. collusive practice by arrangement between two or more parties to the procurement process or Contract execution, designed to achieve with or without the knowledge of the procuring agency to establish prices at artificial, noncompetitive levels for any wrongful gain;*
- viii. offering, giving, receiving or soliciting, directly or indirectly, of anything of value to influence the acts of another party for wrongful gain;*
- ix. any act or omission, including a misrepresentation, that knowingly or recklessly misleads, or attempts to mislead, a party to obtain a financial or other benefit or to avoid an obligation;*
- x. obstructive practice by harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in a procurement process, or affect the execution of a Contract or deliberately destroying, falsifying, altering or concealing of evidence material to the investigation or making false statements before investigators in order to materially impede an investigation into allegations of a corrupt, fraudulent, coercive or collusive practice; or threatening, harassing or intimidating any party to prevent it from disclosing its knowledge of matters relevant to the investigation or from pursuing the investigation, or acts intended to materially impede the exercise of inspection and audit process*

24.2. In the event the Procuring Agency terminates the Contract in whole or in part, pursuant to GCC Clause 24.1, the Procuring Agency may procure, upon such terms and in such manner as it deems appropriate, Goods or Services similar to those undelivered, and the Supplier shall be liable to the Procuring Agency for any excess costs for such similar Goods or Services. However, the Supplier shall continue performance of the Contract to the extent not terminated.

25. Force Majeure

25.1. Notwithstanding the provisions of GCC Clauses 22, 23, and 24, the Supplier shall not be liable for forfeiture of its Performance Guarantee, liquidated damages, or termination for default if and to the extent that its delay in performance or other failure to perform its obligations under the Contract is the result of an event of Force Majeure.

Bidder's Signature and Stamp

The Urban Unit

Urban Sector Planning & Management Services Unit (Pvt.) Ltd.

25.2. For purposes of this clause, “Force Majeure” means an event beyond the control of the Supplier and not involving the Supplier’s fault or negligence and not foreseeable. Such events may include, but are not restricted to, acts of the Procuring Agency in its sovereign capacity, wars or revolutions, fires, floods, epidemics, quarantine restrictions, and freight embargoes. Both, the Procuring Agency and the Supplier, may agree to exclude certain widespread conditions e.g: epidemics, pandemics, quarantine restrictions etc. from the purview of “Force Majeure”.

25.3. If a Force Majeure situation arises, the Supplier shall promptly notify the Procuring Agency in writing of such condition and the cause thereof. Unless otherwise directed by the Procuring Agency in writing, the Supplier shall continue to perform its obligations under the Contract as far as is reasonably practical, and shall seek all reasonable alternative means for performance not prevented by the Force Majeure event. Any difference of opinion concerning “Force Majeure” may be decided through means given herein below.

26. Termination for Insolvency

26.1. The Procuring Agency may at any time terminate the Contract by giving written notice to the Supplier if the Supplier becomes bankrupt or otherwise insolvent. In this event, termination will be without compensation to the Supplier, provided that such termination will not prejudice or affect any right of action or remedy which has accrued or will accrue thereafter to the Procuring Agency.

27. Termination for Convenience

27.1. The Procuring Agency, by written notice sent to the Supplier, may terminate the Contract, in whole or in part, at any time for its convenience. The notice of termination shall specify that termination is for the Procuring Agency’s convenience, the extent to which performance of the Supplier under the Contract is terminated, and the date upon which such termination becomes effective.

27.2. The Goods that are complete and ready for shipment (if applicable) within thirty (30) days after the Supplier’s receipt of notice of termination shall be accepted by the Procuring Agency on the Contract terms and prices. For the remaining Goods, the Procuring Agency may choose:

- (a) to have any portion completed and delivered at the Contract terms and prices; and/or
- (b) to cancel the remainder and pay to the Supplier an agreed amount for partially completed Goods and Services and for materials and parts previously procured by the Supplier.

28. Resolution of Disputes

28.1. After signing the contract or issuance of purchase order, The Procuring Agency and the Supplier shall make every effort to resolve

amicably by direct informal negotiation any disagreement or dispute arising between them under or in connection with the Contract.

28.2. If, after thirty (30) days from the commencement of such informal negotiations, the Procuring Agency and the Supplier have been unable to resolve amicably a Contract dispute, either party may require that the dispute be referred for resolution to the formal mechanisms specified in SCC. These mechanisms may include, but are not restricted to, conciliation mediated by a third party, adjudication in an agreed and/or arbitration as per rule 68 of PPR-14 and in accordance with Arbitration Act-1940.

29. Governing Language

29.1. The Contract shall be written in the language specified in SCC. Subject to GCC Clause 30, the version of the Contract written in the specified language shall govern its interpretation. All correspondence and other documents pertaining to the Contract which are exchanged by the parties shall be written in the same language.

30. Applicable Law

30.1. The Contract shall be interpreted in accordance with the laws of Punjab (Pakistan) unless otherwise specified in SCC.

31. Notices

31.1. Any notice given by one party to the other pursuant to this Contract shall be sent to the other party in writing or by any information technology mean for the time being in use and acceptable in ordinary course of business to the other party's address specified in SCC.

31.2. A notice shall be effective when delivered or on the notice's effective date, whichever is later.

32. Taxes and Duties

32.1. Supplier shall be entirely responsible for all taxes, duties, license fees, etc., incurred until delivery of the contracted Goods & Services to the Procuring Agency. In case of imposition of new taxes/duties or concession thereof after the deadlines for the submission of bids the effect thereof shall be borne or availed by the procuring agency as the case may be.
